I-Bar Series **Clearance Bars**

Signal-Tech
LED Directional Signs & Signals

I-Bar Series Non-illuminated Clearance Bar

The I-Bar Series low-height clearance bars are modular and available to be ordered at any length that is needed, for your specific application. They are made from heavy-gauge, extruded aluminum and measure 7" tall by 4" deep, and are shipped ready to install. Each bar is installed by hanging it from the included adjustable, heavy-duty eyebolts. The standard finish is traffic yellow; custom messages and finishes are available as requested.

did you know...?

Modularity for Shipping

When the overall length of our clearance I-Bar is greater than 90", it is shipped in segments. Shipping in multiple segments gives us the freedom to manufacture the I-Bar in any length desired, but most importantly it reduces the shipping costs, allows for easier handling, and eliminates the need to ship freight. For clearance bars exceeding 90", 2 or more segments will be sent along with a joiner piece to connect them. Clearance bars with more than 1 segment will always be seamed and each segment requires 2 eyebolts for proper installation.

...three can become one!

Hardware Included

Heavy-duty eyebolts and carriage bolts are supplied to evenly support the I-Bar across its length. Two eyebolts are required for each modular section. It is advisable to place the Carriage bolts on both sides of the split where the I-Bar sections meet. This gives the I-Bar the support needed to prevent possible sagging.

and paint color available

I-Bar Mast Arm Post

Designed to free hang a Clearance I-Bar up to 6 feet wide. Constructed using two extruded aluminum posts that intersect at a 90° angle and are bolted together with a structural gusset. The vertical post includes a welded 12" x 12" base plate with gussets for mounting.

PRODUCT #21634

System Specifications

General Specifications

- 7" high x 4" deep Aluminum Extrusion
- Available in whole lengths up to 90", I-Bars over 90" use joiner extrusion
- Heavy-duty eyebolts included for mounting
- High -performance reflective vinyl messages and symbols
- Ready to install - no sand or concrete to add and no vinyl to apply
- 5-Year warranty

Custom Options

- Custom paint colors and matching
- Reflective vinyl message colors
- Double sided messages
- Custom long lengths available using joiner extrusion making shipping feasible
- Mast Arm Post
