- SBLF messages always readable
- 2 Year warranty
- Custom messages, no minimum order quantities
- Manufactured in the USA

The SBLF Series Indoor LED Backlit sign has a large message area which enhances the impact and visibility of your sign. The sign message is viewable in daylight conditions when off and can be illuminated in low light conditions to optimize readability.

The sleek 2 1/4" deep cabinet is constructed of corrosion-resistant, extruded aluminum and includes our built-in Lift'n Shift back for wall mounting. Ceiling, post and wall-projection mountings are available. Standard cabinet finish is Duranodic Bronze; custom paint finishes are available. Engineered with a solid-state circuit board and switchmode power supply for maximum LED life. Sign can be controlled by switch or third party relay. (Control switch purchased separately.)

Message Options

Say what you want, all SBLF backlit signs can display any message. The message can be in any color of vinyl.

Include a logo or graphic to bring more attention to a sign or message. The SBLF Series will accommodate graphics or logos. Graphics may include anything from warning symbols such as do not enter or handicap symbols to shapes like Arrows, Circles or Pedestrians.

Just like we're not limited to words, we are not limited by language. You can also design signs to include other languages and create multi-lingual messages in Spanish, French, German, Arabic, Chinese, etc.

Character Styles

Choose the character style by the character size, font and upper/lower case letters. Character height dependent on the size of the sign and the length of the message.

Cabinet Options

All cabinets can be painted to match any color upon request. Color matching is available.

Details are typical only - some details may vary.
